

## Our Children's World by Ahtutu's Class of 2018

The world I want for our children is one where...

- there is no terror and all the people live under just laws
- we all reach knowledge and education and we have a developed country where we have peace and justice
- quality education, peace and justice exist with no jealousy and we are all respectful and helpful to each other
- it is a peaceful place with a high standard of education teaching and justice for men and women, where we develop our country
- I want good education for all and people are able to play many sports. To be healthy we must do physical exercise regularly.
- My children get to go to school. I can support my children to be good and kind and become good teachers to others.

- We can show others how to be healthy and guide everyone to become good people for their country, families and religious communities. If they feel depression I want to encourage them to see good signs and to live by God every day. I want to share the Good News about God, that God is love and he can give us everything. If we live by God we must gain peace and quiet. God will guide the poor in spirit.
- I want my children to attend a good school. I want them to become good people. I want to build a good education centre for them and a medical care centre. I want them to eat healthy food. When my children want to do something I will agree. My children will have gender equality. They will love each other. People should be patient with their children because most of them want to know. We should be patient with them.
- the place is happy, peaceful and lovely. My children will be braver than other children. My children will get a good education, good knowledge and be kind and generous. My children will be proud and I will be proud of them in front of other people.
- every child must have a great quality education because education can change our lives magically. Everyone can live safely. Every child must be with

his or her family. All children will get an equal chance.
